

Wheat Demonstration – Saline County, Nebraska (North of Swanton) 2007

Wheat Variety:

Planted:

Sprayed: May 16, 2007

Non-ionic surfactant: added to spray mixture at 0.25% v/v

Spray Equipment: CO2 powered backpack sprayer set at 30 psi, 4 TeeJet 8001vs nozzles 1ft apart of 4 ft boom.

Experimental Design: Randomized complete block design

Number of replications: 3

Treatment	Yield (bu / A)
Headline 6 fl. oz / A + NutriPak 16 fl. oz / A	77
Headline 6 fl. oz / A	70
Check	65
LSD (0.05)	8

No foliar diseases were observed. However, leaf senescence was considerable delayed in the Headline and Headline + NutriPak treated plots compared to the check plots.
